

1) Focus strategy map:

Question: How do participants combine different focus strategies during their study/work sessions?

- The more frequently two strategies appear together, the stronger/larger connection would be

• Example:

- Timer
- Headphones
- Music
- Phone away

- A line is drawn between two strategies when they are used together in the same session.
- A frequently combination occurring combinations like Music + Headphones have double lines

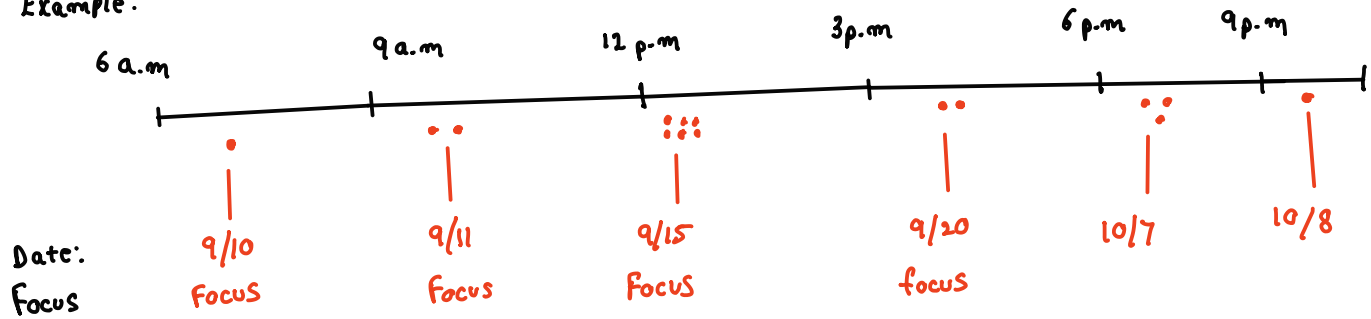

2) Time of session map.

Question: Does the pattern of focus and first distraction vary by time of day?

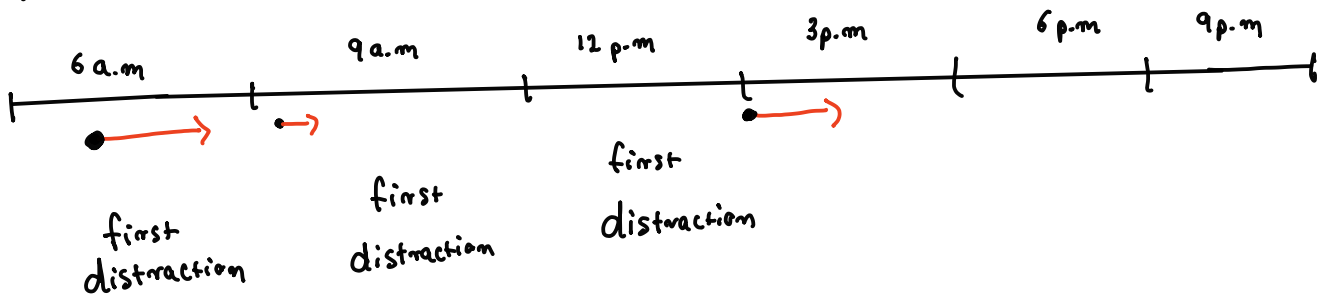

- A 24-hour timeline
- Each dot = Session

Time of Day

Example:

Then distraction:

- Dot position = when session started
- Arrow Length = time until first distraction
- Dot size = focus rating

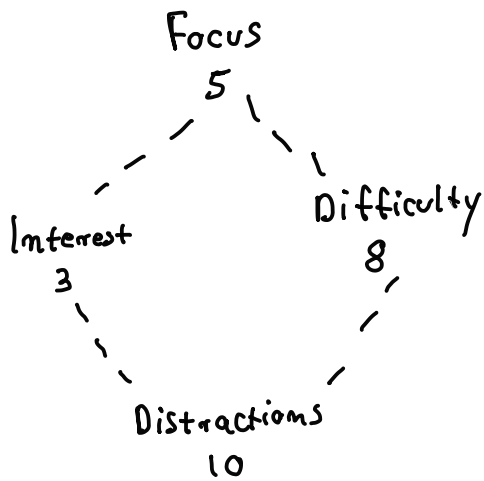

3) Session Profile map

Question: How do you study/work session differ in their overall focus and distraction profiles?

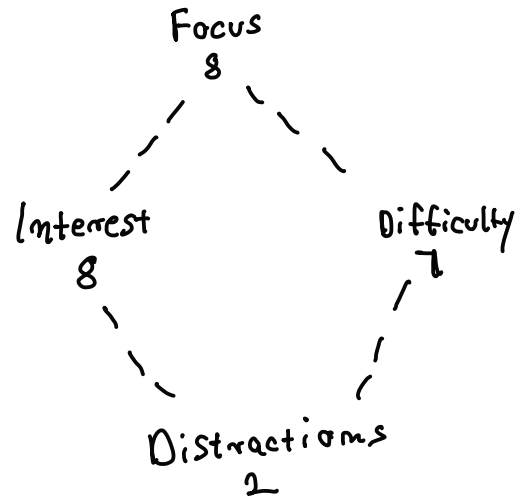

- Focus rating
- Task interest
- Task difficulty
- Number of distraction
- Time to first distract

Session-Style:

• Session A:

Session B:

- Session A: lower focus, less interesting, difficult, many distractions
- Session B: high focus, interesting, moderately difficult, few distractions
